ROAD DATA BANK IN SLOVAKIA

Pursuant to the Act No. 135/1961 Coll. on Roads (Road Act) Road Data Bank is an integral part of information system of the roads. It serves as a tool for administration of data from the central technical evidence and diagnostics of the roads and their use within the road network of the Slovak Republic.

Through its own capacities and in cooperation with owners and administrators of the roads it provides:

- Collection and processing of technical data from the roads
- Diagnostics of the roads
- Development and construction of Geographic Information System (GIS)
- Information service of the Data Bank

Collection of inventory data

Data collection through GPS

Road databank operates application system of evaluation and determination of routes for excessive and oversized transport. Proposal and evaluation of the transport route is part of the request for permission of unusual use of the road.

Excessive and oversized transport
