ROAD DATABANK / ABOUT US

Road Databank, department of Slovak Road Administration, is responsible for operation of Central technical Register of Roads, determination of Abnormal Transport Routes and operation of Traffic Information Centre. These activities represent the duty of Ministry of Transport, Construction and Regional Development of Slovak Republic given in Act No. 135/1961 Coll (Road Act).

Operational Area for all of Road Databank activities is the whole Road Network in Slovakia, particularly motorways, expressways, state, regional, local Roads and since 1st January 2017 also municipal Roads.

Awards of IS MCS: Special Achievement in GIS 2011 Esri, ITAPA 2010 1st place in Category Improvement of processes, Microsoft Industry Awards 2011 Finalist

Operation of Road Databank represents wide range of processes, which are supported by modern information technologies covering data collection, data processing and data use. There are running a lot of software applications and software tools under Information System of Road Network Model.

Road Network Model is central database where all the data of Central technical Register of Roads are stored. Data Model of reference Road Network is being created in accordance to STN EN ISO 14825:2012-01 – Intelligent Transportation Systems, Geographic Data Files (GDF), (ISO 14825: 2011).

Data collection and Pavement Diagnostics

Road Vector Model is reference Base for all Road Data (Road Inventory, Pavement Data, Road Structures, etc.) which are collected; all Data are linearly referenced to corresponding Road Section.

Operation of Data Collection is a centralized process, this means that it is operated by staff of Road Databank itself. The main reason for that is the fact, the Data Collection Methodology is rather complicated and it demands permanently trained group of specialists. Centralization of Pavement Diagnostics operation is determined by difficult operation and economic effectiveness of pavement equipment.

Road Databank Department is formed in such a way, the main activities are supported by own technology and operated by own personal capacity. Road Data are collected and processed at central level and put into use to Road Administrators at local level.

Data collection is realized by special equipment technologically suitable for particular purpose supported by software tools developed by equipment manufacturers or especially developed for this purpose within Information System of Road Network Model.

Road Databank operates modern technical equipment for Road Diagnostics and Data Collection of reference network and other Road Inventory Data:

- KUAB FWD 150, 50 – bearing capacity measurement
- PROFIOGRAPH – pavement unevenness measurement
- SKIDDOMETER BV 11 – longitudinal skidding resistance measurement

- VIDEOCAR – quick visual inspections of pavement surface
- LINESCAN – recording of pavement surface defects

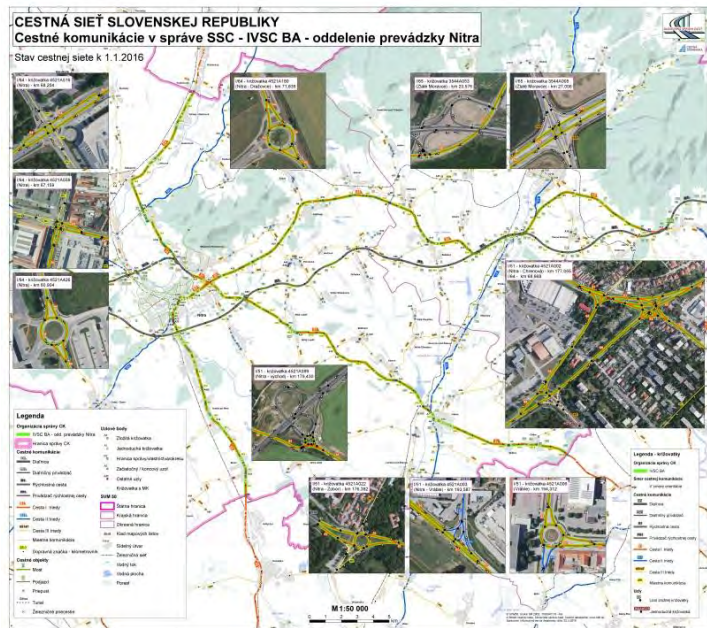

- Special equipped cars for Reference Network Data and other Inventory Data collection (DGPS technology and software application for Data collection)

Data Processing and Data use

First step of Data processing represents Data input into central Database through software applications operated directly in field during Data Collection or under office conditions at Road Databank Department. After that, there is a lot of processing needed to secure valid Data in forms suitable for further use.

Data of Central technical Register of Roads officially represent the sector of Transportation; Road Network Model is the unique vector Model of Road Network with a wide range of technical Data). Therefore the Data are used at all levels of state, regional and local Road Management and other state sectors (Ministry of Transport, Construction and regional Development of Slovak Republic, research Institutes, Road Agencies, state and regional transportation Agencies, Universities, Municipalities, Police Authorities, Department of Defence, etc.).

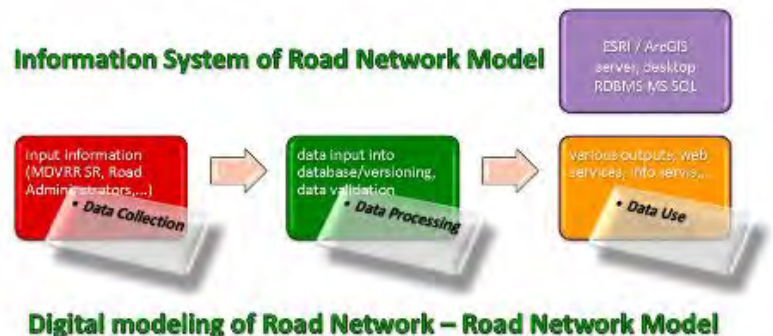

Various Forms of Data provision are used. Road Databank tries to fit the form of Data provision to customer needs. The forms as web map services or web feature services are preferred.

Very important issue is licensing of Data according to Authors Act. Data providing based on license agreement is generally free of charge.

There are a lot of application systems operated within Slovak Road Administration which directly use Data of Central technical Register of Roads – Pavement Management System, Bridge Management System, System for Determination of Abnormal Transport Routes, Traffic Engineering System, etc.

* *Expressways* have been reported in the statistical overviews of the Central Technical Register of Roads of the Slovak Republic as a separate group since 2009. Until year 2009 their length is reported within other road classes. Since 2020 expressways have been reported as **motorways / R** and "R" means construction-technical category.

* *Rýchlostné cesty* sú v štatistických prehľadoch centrálnej technickej evidencie cestných komunikácií SR vykazované ako samostatná skupina od roku 2009. Do roku 2009 ich dĺžka je vykazovaná v rámci ostatných tried ciest. Od roku 2020 sú rýchlostné cesty vykazované ako **diaľnice**, a označenie „R“ znamená stavebno-technickú kategóriu.

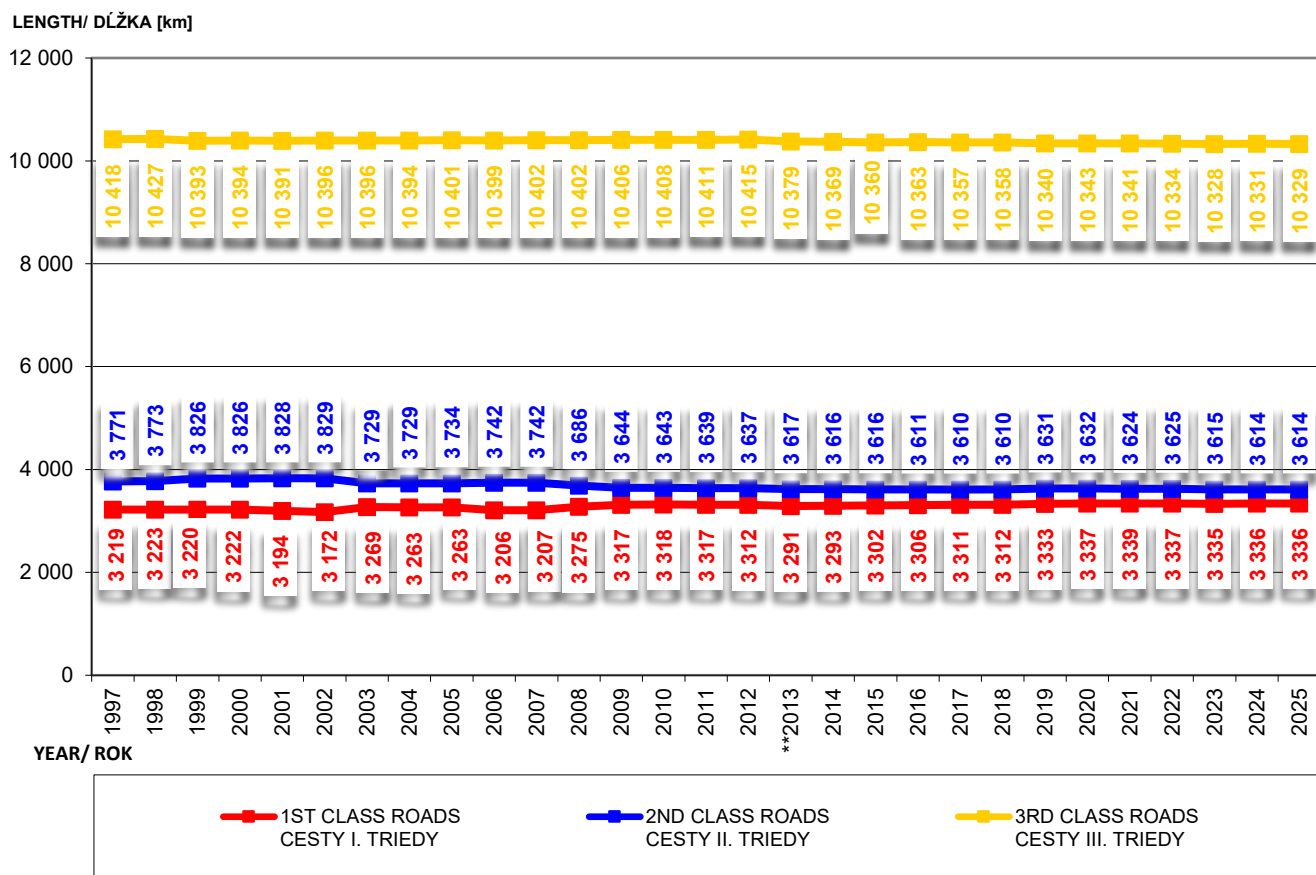

** The differences in length of different road classes compared to the year 2013 were caused by implementation of the new rules of the road sections classification in intersections of roads, based on the Technical regulation TP 078. Some road sections and short motorway feeders, which were included in the road length, were reclassified to slip roads.

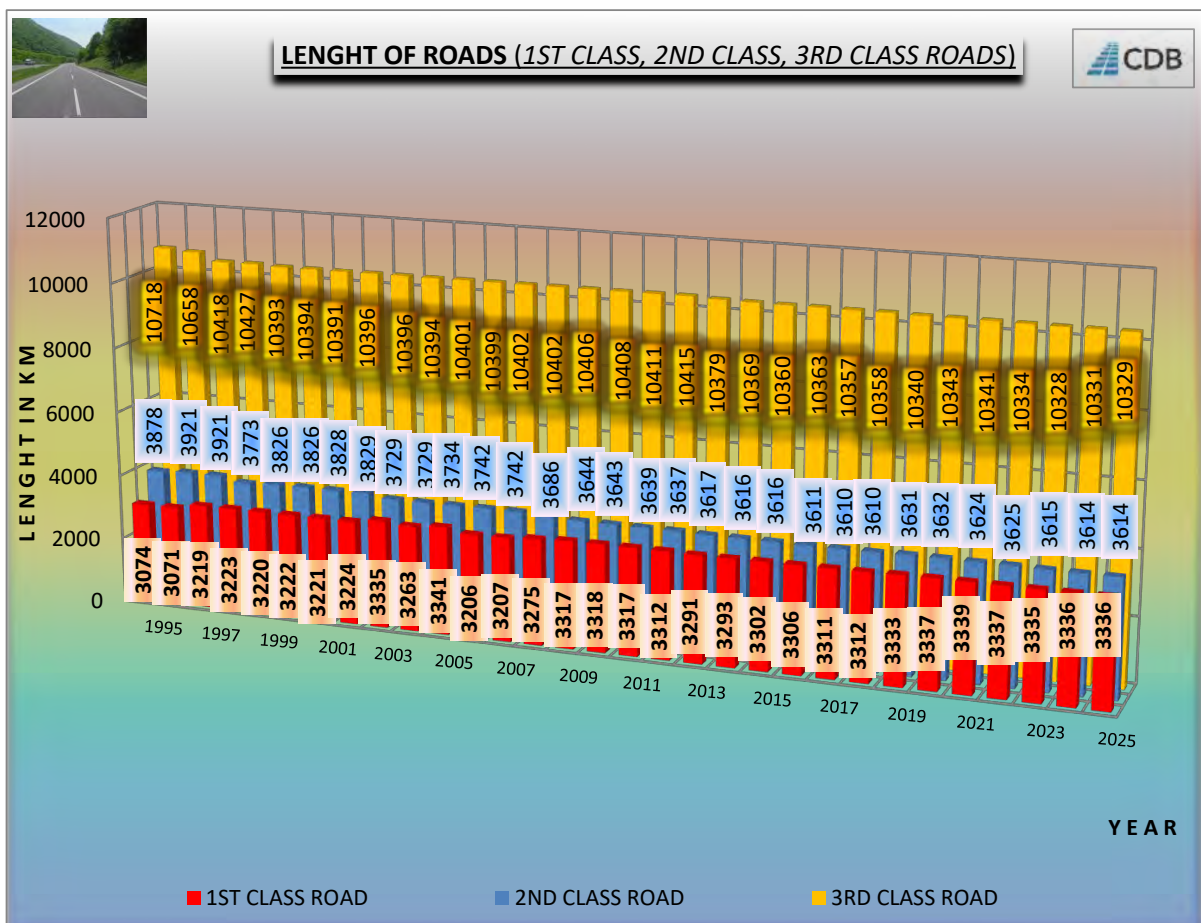

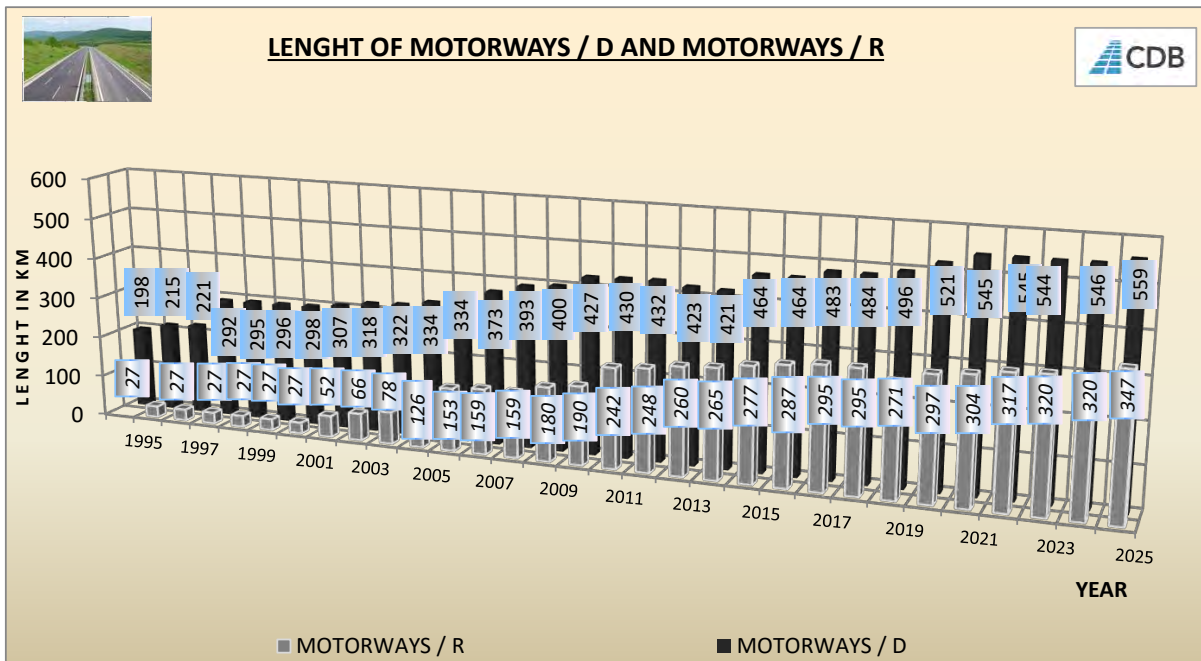

** Zmeny dĺžok v rámci jednotlivých druhov cestných komunikácií podľa dopravného významu (trieda cestnej komunikácie) v porovnaní s rokom

MOTORWAYS DEVELOPMENT VÝVOJ DIAĽNIC

1st, 2nd, 3rd CLASS ROADS DEVELOPMENT VÝVOJ CIEST I.,II., III. TRIEDY

* The differences in length of different road classes copared to the year 2013 were caused by implementation of the new rules of the road sections classification in intersections of roads, based on the Technical regulation TP 15/2013. Some road sections and short motorway feeders, which were included in the road length, were reclassified to slip roads.

TUNNEL CATEGORIES

The international carriage of dangerous goods is regulated by the European Agreement Concerning the International Carriage on Dangerous Goods by Road (ADR). The 2017 Edition is applicable from 1 January 2017. EU Member States are required to apply the ADR provisions to national transport.

- **Tunnel category A:** No restrictions for the carriage of dangerous goods;
- **Tunnel category B:** Restriction for the carriage of dangerous goods which may lead to a very large explosion;
- **Tunnel category C:** Restriction for the carriage of dangerous goods which may lead to a very large explosion, a large explosion or a large toxic release
- **Tunnel category D:** Restriction for the carriage of dangerous goods which may lead to a very large explosion, to a large explosion, to a large toxic release or to a large fire
- **Tunnel category E:** Restriction for the carriage of all dangerous goods except UN 2814, 2900, 2919, 3077, 3082, 3291, 3331, 3359 a 3373 and for all dangerous goods in accordance with the provisions of Chapter 3.4 if the quantities carried exceed 8 tonnes total gross mass per transport unit.

Oversized and Excessive Transport Routes

The Agenda of Determination of Abnormal Transport (oversized, excessive) Routes is a part of complex Agenda of specific Road use as amended by the Road Act.

Transport Routes for Transports which weight is 60 t and more or which height is 4,5 m and more are determined directly by staff of Road Databank itself.

Transport Routes for Transports which weight or height is under values mentioned above need to be approved by Road Databank. In this case the Route Determination is realized by Transportation companies through web based software within Information System of Road Network Model.

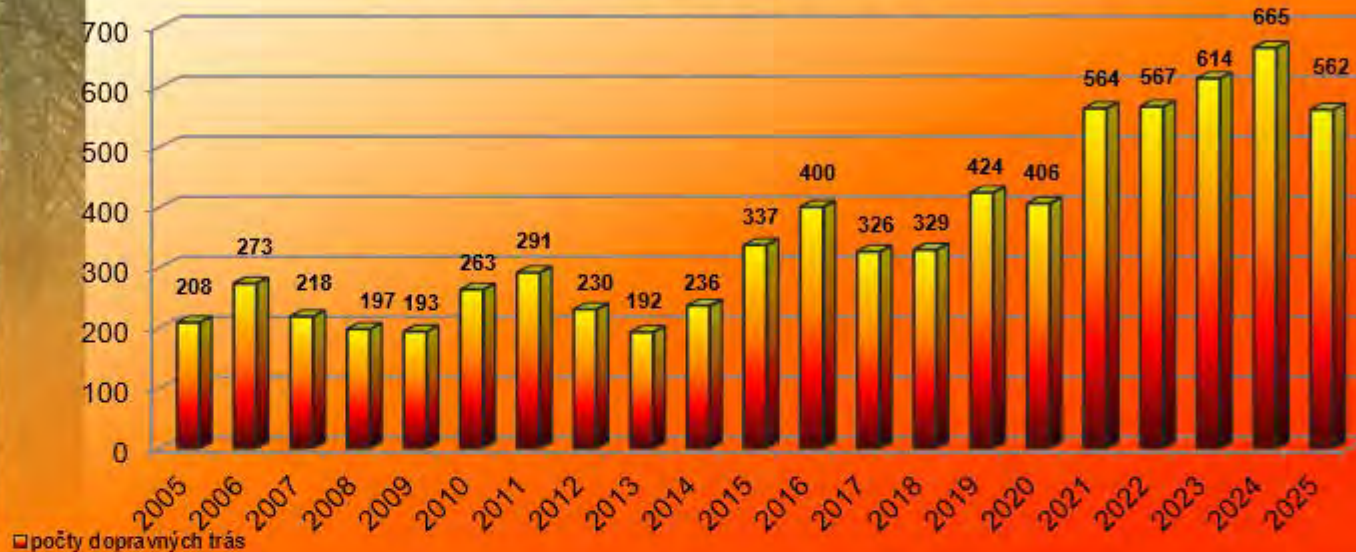

System for Determination of Abnormal Transport Routes is operated within Information System of Road Network Model and uses Data of Central technical Register of Roads and results from technical inspections of Bridges stored in Database of Bridge Management System.

The image displays the 'Portál Informačného systému Modelu cestnej siete' web application. The top navigation bar includes the logo of the Slovak Road Administration and the text 'Portál Informačného systému Modelu cestnej siete'. There are input fields for 'Meno' and '*****' and a 'PRIHLÁSIŤ' button. The main content area features a sidebar with menu items: 'Cestná sieť', 'Dopravné inžinierstvo', 'Spoplatnené úseky', 'Prepravné trasy', and 'Reporty'. The 'Prepravné trasy' section is active, showing a map with a green route highlighted between points A and B. Below the map are buttons for 'SPUŠTIŤ APLIKÁCIU' and 'DETAILY'. The bottom part of the image shows a photograph of a truck carrying a large pipe and a smaller screenshot of the 'Trasy' application interface showing a route map and application details.

Traffic Information Centre

Up-to-date Traffic Information and Traffic Data about all events or incidents which may impact Transport Passing through some Road or Road Section or may impact Road Transport Safety are necessarily needed to secure safe, uncomplicated and comfortable Transport Passing of Roads or Road sections. Traffic Information Centre (TIC) represents technical, technological, operational, organizational and personal office at central level of the Road Network. TIC is responsible for collecting, processing, verification, authorization, use, publication and distribution of Traffic Data and Traffic Information within Information System of Traffic Information Service (IS TIS).

Most of all, TIC processes the long term restrictions on Roads based on official resolutions issued by state Transport Authorities.

During the winter season (from 01.11. until 31.03.) there is a permanent operation of TIC; all of Road Agencies and Administrators give information about weather conditions on Roads under their responsibility in regular time gaps (four times a day). RWIS CEMPRES running as a part of IS TIS is a necessary supporting tool winter road maintenance.
